Shingle Composition

ASTM D3462

CertainTeed offers over 30 styles of fiber glass shingle that are certified by Underwriters Laboratories to meet ASTM D3462 requirements, the roofing industry's tough shingle performance standard.

The industry's toughest warranties

CertainTeed offers exclusive SureStart™ protection, which provides full replacement cost (including materials and labor) during the crucial early years after installation.

ROOFING SHINGLES

Saint-Gobain is proud to present Roofing Shingles
The world's widely used roofing solution is now in India !

What?

Shingles are composites of reinforced fiberglass and mineral stabilized, high grade asphalt. They are overlaid with high strength ceramic coated granules, below which is a mineral stabilizer cum fire-retardant coating. This entire composition comes in the form of mats.

A sheet of Shingle has a thickness in the range of 4 to 12mm and is about by 3feet x 1feet in size. They are packed in bundles of about 25 sheets.

Why?

Beautiful Aesthetics : The most attractive feature of Shingles is their alluring aesthetics. They are available in a variety of profile patterns and distinct colors. They provide international looks, while retaining the natural essence of the surroundings.

Strong Technical Attributes: Shingle application ensures 100% waterproofing. In addition, they also offer resistance to algae, impact force, wind and fire. They are flexible and unbreakable. They virtually require no maintenance and come with a product warranty ranging from 20 to 50 years.

Where?

Shingles are greatly versatile. They easily adapt to diverse weather conditions and offer an unflinching performance. They can be conveniently applied on any kind of sloped (pitched) roofs that are hard and even. They can be suitably laid on RCC slabs, wooden decks, fiber-cement boards, etc. The roof substrate that it can be applied include *steep -slope / curved / arched / conical / dome - shaped* roofs.

ADVANTAGES OF SHINGLES

A WIDE RANGE OF SHADES AND COLOURS

- 10 different types and 58 colours, among which to choose the most suitable roof for your project.

A PRODUCT FOR ALL TYPES OF CLIMATE

- Not sensitive to frost (the product has been tested at -40°)
- Not sensitive to heat (the product has been tested at $+90^{\circ}\text{C}$)
- Wind resistant
- Hail resistant
- Not affected by environmental pollution
- Stands up to any sudden change in temperature
- Waterproof.

IT CAN BE USED SUCCESSFULLY ON ROOFS OF ANY SHAPE

- Any kind of project can be carried out easily and with the maximum safety

COLOURS DO NOT CHANGE THROUGH TIME

- The granules do not absorb water and therefore it does not deteriorate.
- The colouring is carried out through a ceramic process at a temperature higher than 650°C .
- The inorganic pigments used for the colouring are resistant to the UV radiation and to high temperature.

LIGHT ROOF SYSTEM

- Compared weights of different types of roof systems for a roof of 300 m^2 metres.

- Reduction of the dimension of the carrying structure
- The less total weight corresponds to minor load and more safety

NO MAINTENANCE

→ You can safely walk on a roof covered with CertainTeed shingles to inspect it, as they are skid resistant and are not brittle

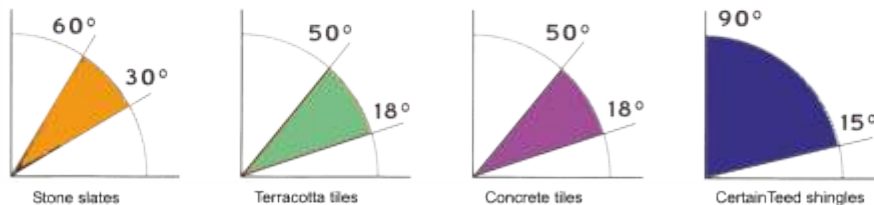

UNIFORM SPECIAL ROOF ACCESSORIES

- 1) Along the hips
- 2) With varying slopes
- 3) Along the valley
- 4) Along the ridge

USED IN A WIDE RANGE OF SLOPES

→ Comparison of the different slopes used for different roofs

IN COMPARISON TO A BITUMINOUS ROOF

- The roof with CertainTeed shingles is made of little elements, which absorbs the movements of the structure easily.
- It is a discontinuous roof which allows ventilation inside the roof.

IN COMPARISON TO A METAL ROOF

- Quiet in rain or wind
- There is no condensation
- Doesn't become rusty

EASY PACKAGING

- Does not break during transportation
- Easy to transport and store
- Easy to lift it up the roof

Other Advantages

- CertainTeed Shingles come with 20-50 years limited International Warranty
- More than 100 years of trust & market leadership

Versatility of the Product :

- Can be used on both
- (a) Concrete Deck
 - (b) Wooden Deck
